

Hi! My name is Symbat Altynbekova!

Product Designer — Almaty, Kazakhstan

MEET ME

I am a product designer passionate about turning complex, high-stakes processes into clear, trustworthy user experiences. Largely involved in banking and fintech products, designing for compliance, security, and financial workflows where clarity and precision really matter.

I started out as a graphic and web designer before deciding to niche into UX/UI design. I am based in Almaty, Kazakhstan, open to hybrid and remote work.

EXPERIENCE

Alatau City Bank (ex. Jusan Bank) Nov 2024 - Currently
Kazakhstan, Almaty
UI/UX designer / Visual identity designer

- Designed an internal customer-base system, unifying data and processes across client categories, including custody, into a single interface.
- Designed compliance modules (insider registry, committee registry) and an external document-signing flow (digital signature / OTP) for third-party signatories, working closely with the compliance department.
- Translated complex banking processes and business requirements into clear user scenarios, prototypes, and development-ready interfaces.
- Built collaborative workflows between business stakeholders, analysts, and developers — contributing to requirements analysis, identifying pain points, and proposing product solutions before development began.
- Developed the bank's design system, standardizing components and patterns so new interfaces could be built faster while staying visually and functionally consistent.
- Independently owned several product directions end-to-end, from problem definition to quality control and post-launch improvement.

EVRIKA COMPANY, LLP Oct 2021 — Oct 2024
UX/UI designer

- Redesigned the main company website, apps, designed a broker system, researched target- audience behavior, built a UI kit, and created prototypes. Conducted UX audits and designed existing interfaces from scratch.

International Information Technology University (IITU) Sep 2020 - Jan 2025
Web Design Tutor

- Taught web design and UX/UI fundamentals. Ran hands-on workshops on building websites, developed course materials, reviewed student projects, and provided feedback.

iLab, LLP Jul 2020- Jun 2021
UX/UI designer

Built a UI kit from scratch for sale, developed a design system, deepened understanding of user-interaction logic, and analyzed the market and competitors.
